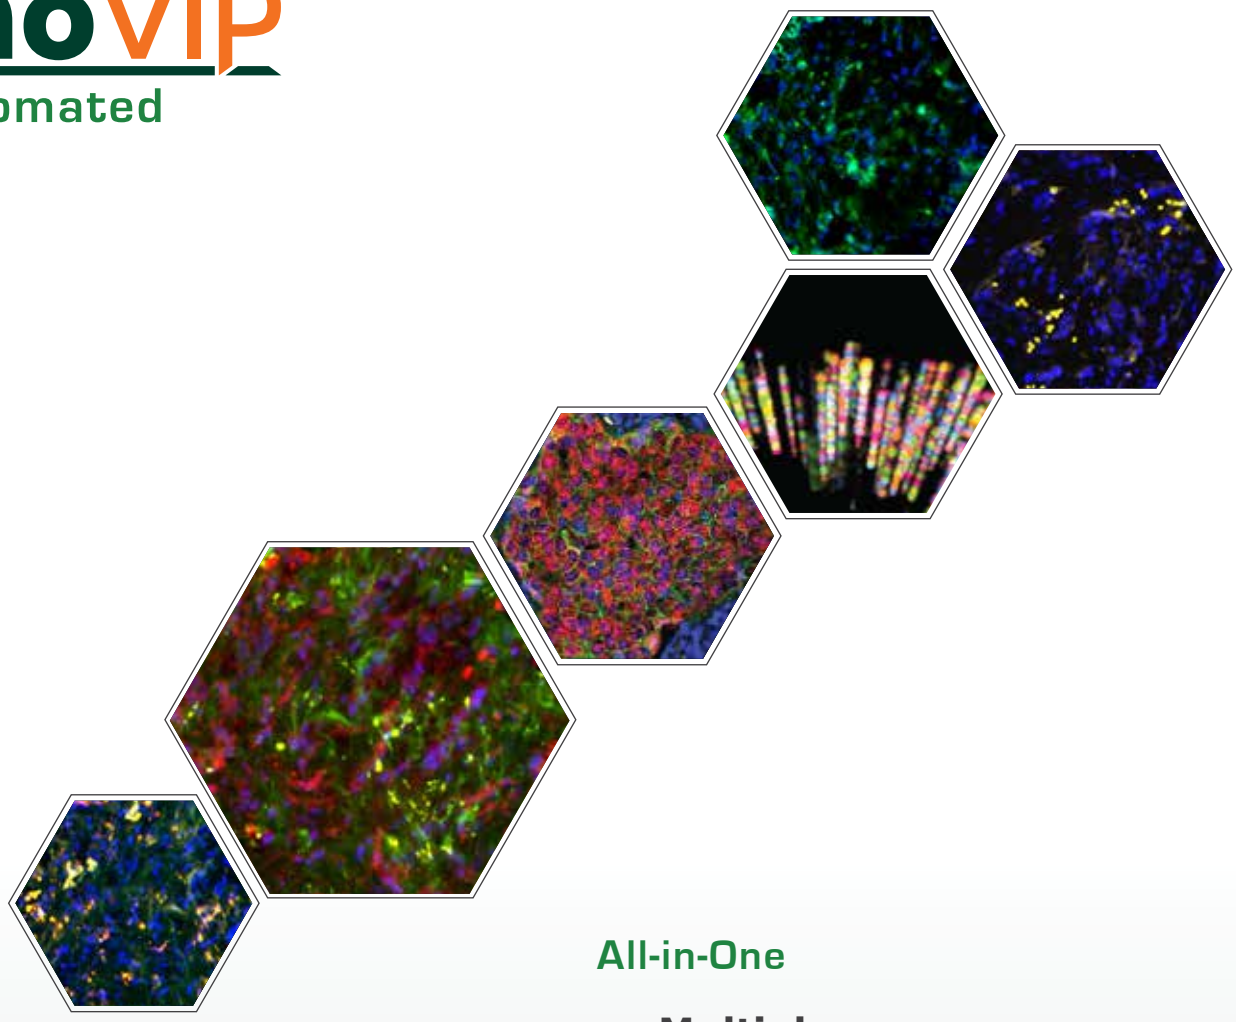
New

NanoVIP®

Fully Automated



All-in-One

- **Multiplex**
  Co-localization of
  Protein, mRNA, DNA & miRNA
- **OPAL Protocol**
- **miRFISH**
  miRNAFISH
- **ImmunoPlex**
  Low, medium and high-plex
- ***eFISH***
  mRNA and DNAFISH
- **In Situ Sequencing**

BioGenex

Accelerating the pace of precision medicine

NanoVIP®

- Fully automated system from baking to DAPI with final coverslip
- EZ-AR2 Elegance – All in one de-wax, hydration and universal retrieval solution for all Proteins and Nucleic acids
- Clean intense stain for all antibodies and Probes
- Open System for automation of any slide-based assay
- Run ten independent protocols simultaneously
- Precise temperature on each workstation
- Liquid sensors for accurate liquid handling
- Precise volume dispensing from 10 micro liter to 80 micro-liter
- Option for programming of short critical steps

Additional features:

- Option for manual application of micro reagents to save cost
- Incorporate multiple rounds of staining, reagent stripping and removal of coverslip to prepare for second staining run
- Co-localization
- Compact Bench top system
- Multi-specimen format- FFPE & Frozen tissue
- Prepare and stain Cytology and Circulating Tumor cell(CTC) specimen
