

# EZ-Retriever<sup>®</sup> IR System

## All-in-One All-at-Once

- Precise temperature detection thru IR sensor
- Large touchscreen for easy setup of protocols
  - Dewax, rehydration, and antigen retrieval
    - 96 slides in under 30 min
    - Superheating fluid: No boils and spills
    - Ultraclean intense stain
    - Antigen, nucleic acid and decal retrieval

Antigen Retrieval, invented by BioGenex, is an effective way of unmasking antigenic epitopes on the surface of formalin-fixed, paraffin-embedded tissue sections using microwave heating. The Antigen Retrieval technique breaks the formalin-induced cross-linking bonds between epitopes and unrelated proteins, allowing better penetration of antibody and accessibility of epitopes. Covered by exclusive patents issued to BioGenex, this method has been practiced in laboratories throughout the world.
